

ACESSO TL MEMBRANE IS A TRIPLE LAYER AMNION DERIVED ALLOGRAFT OPTIMIZED FOR WOUND COVERING, PROTECTION, AND ADVANCED WOUND TREATMENT.

THE ACESSO TL ADVANTAGE

- Increased tissue adherence
- Greater strength, thickness and ease of handling
- Natural, biocompatible scaffold supports tissue growth
- Minimal processing retains higher molecular weight of hyaluronic acid, maintaining structural tissue strength
- Safe and effective up to 5 years from date of manufacture

ORDERING INFORMATION Q4300

Product #	Size	Total Units (Per Sqcm)
ATL-0202	2x2	4
ATL-0203	2x3	6
ATL-0404	4x4	16
ATL-0406	4x6	24
ATL-0408	4x8	32
ATL-0710	7x10	70

The **Acesso TL Membrane** is a triple layer amnion membrane and has better tissue adherence than a single or double layer amnion membrane, which means that it is more likely to stay in place and promote healing. The product is indicated for full and partial thickness, chronic, and hard-to-heal wounds. Our manufacturing practices strictly comply with both AATB guidelines and FDA regulations, with minimal processing that preserves tissue structure and is intended for homologous use. The allograft is then dehydrated and terminally sterilized. **Acesso TL Membrane has been confirmed by the FDA Tissue Reference Group to meet regulation criteria solely under Section 361 of the PHS Act as defined in 21 CFR Part 1271.**
